DESCRIPTION

If you love DIY cable-rigging, then these HDMI adapters are right up your alley! Making custom HDMI cables has never been easier. Just grab one of our HDMI ribbon cables, then swap and switch any of our HDMI adapters on each end using the flex cable clips. There are options a-plenty!

This version is a **right angle (right bend) HDMI plug**.

Ribbon cable and other adapter not included! Check out all of the options we have in the

shop to craft your very own custom cable.

We tested out these DIY cable kits with a Raspberry Pi at 1080P and they worked great but note that they are not going to be as durable or shielded as ready-made cables.
