# CYC1000 – Cyclone 10 Starter Board

## CYC1000

### Lowest cost Cyclone 10 LP Starter Board

The CYC1000 board is a low-cost starter board for the new Intel FPGA family Cyclone10. The board can be used for evaluation or also in a customized version as qualified solution in an end product. With the implemented Arrow USB Programmer2, it's a full featured plug&play solution without additional costs. It's available as standard version, but can also be ordered in a customized variant, depending on your requirements. The CYC1000 is also perfect for implementing a flexible softcore microcontroller, like NIOS II from Intel.

### Features CYC1000:

- Lowest cost Cyclone 10 solution on the market
- Intel Cyclone 10 with 25kLE
- MKR standard 25x61.5mm<sup>2</sup>
- Integrated Arrow USB Programmer2
- Preprogrammed Demo Application
- Plug&play full featured FPGA board
- PMOD connector to adapt various solutions
- Customized board available for real end products!!!
