DESCRIPTION

When you need a portable 12V power pack, this big holder will do the job! The holder will store 8 AA batteries end to end, to give approximately 12VDC output with up to 2 amp peak current draw. We like this configuration in particular because it holds the batteries securely, even if being bumped/moved around.

This would make a good power source for [EL panels](#), [12V stepper motors](#) (for a robot), or analog LED strip such as this [30 RGB LED](#), [60 LED RGB](#) or [warm white](#). You may want to pick up a [DC power plug adapter](#) to connect onto the wires for easy plugging.

Batteries are not included, can be used with any AA-sized Alkaline or Rechargeable batteries.
