DESCRIPTION

TECHNICAL DETAILS

DESCRIPTION

We've got a simple and highly functional solution to wiring your Adafruit Feather board! These **0.1" Pitch Terminal Blocks**, are exactly the right size to it your Feather board or FeatherWing. They are great news since nothing makes a project harder to maintain than a lot of loose wiring. Perfect when you don't need a full Terminal Block FeatherWing

These terminal blocks are big enough for a range of wire gauges: 20-30AWG solid or stranded. They are easy to adjust with a screwdriver, but not too chunky, so they won't take up too much space on your Feather. Just solder them on top or bottom and off you go!
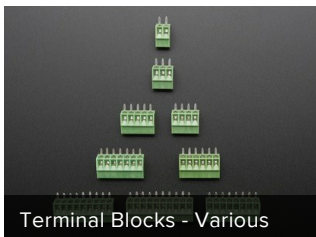

Feather not included

TECHNICAL DETAILS

- Datasheet
