[DESCRIPTION](#)

[TECHNICAL DETAILS](#)

## DESCRIPTION

These go great with our silicone tubing for air pumps and valves - great for making adapters or extenders. The two ports have an outer diameter of about 4mm, so 2-3mm ID silicone tubing

will make a nice seal.  
Downloaded from [Arrow.com](#).

Comes in a pack of 5, so you have plenty to mess with.

## TECHNICAL DETAILS

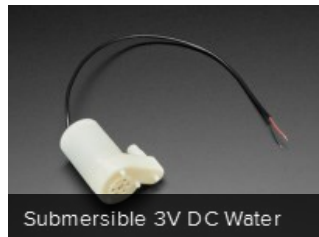

- Dimensions of single connector: 25.3mm x 5.8mm
