Specifications

Application	Paint Preparation , Primer Sanding
Attachment Type	PSA
Backing Weight	A Weight
Brand	3M™
Case Quantity	6 Rolls per Case
Color	Gold
Converted Form	Disc Roll
Diameter	6 in
Diameter (Metric)	152.4 mm
Grade Range	Medium (320 - 1000)
Grit	P400

Mineral Type: Aluminum Oxide

Number per Inner	1 per Roll
Packaged Form	Rolled
Performance Level	Good
Product Form	Disc Roll
Sanding Method	Hand , Machine
Sanding Surface	Clear Coat , Fiberglass , Paint , Plastic , Primer
Vacuum Support	No
Wet or Dry	Dry

Details

- Adhesive-backed discs tear off conveniently one at a time with no liners for added cost savings
- A-weight paper backing is ideal for fine power sanding and finishing
- Aluminum oxide mineral combines fast cut with long disc life
- Stikit™ discs are easy to attach and remove
- Anti-loading coating prevents dust and debris from clogging the disc
- Several versions feature 7-hole pattern for added dust removal and loading resistance

Our 3M™ Stikit™ Gold Disc Roll 216U features aluminum oxide mineral abrasive for a sharp cut and uniform finish during collision repair. These tear-off discs are packed into a single roll and feature Stikit™ adhesive attachment, making them exceptionally fast and easy to use. Load-resistant coating and available 7-hole pattern help clear dust from the disc surface for longer life.

The Ease of a Disc Roll, The Speed of Stikit™ Attachment

3M™ Stikit™ disc rolls are multiple adhesive-backed abrasive discs rolled onto a core. This makes them easy to tear off one at a time for speed and efficiency, and there's no need for liners which saves on material costs. These ready-to-use Stikit™ discs feature a pressure sensitive adhesive coating on the backs — simply press the disc onto the backup pad and you're ready to go. They remove just as cleanly, leaving an uncontaminated surface for the next disc. We recommend using Stikit™ discs with 3M™ Stikit™ Disc Pads.

Sharp Abrasive for a Refined Finish

With its open coat construction and aluminum oxide mineral abrasive, our 3M™ Stikit™ Gold Disc Roll 216U provides a sharp cut — more aggressive than a comparable closed coat abrasive of the same grade. Light A-weight paper backing and a range of medium-coarse to fine grits make the disc ideal for featheredging and primer sanding. The Stikit™ Gold Disc Roll 216U is available in a range of sizes and works with all collision repair substrates including clear coat, fiberglass, paint, primer and plastic.

3M™ Gold Abrasives deliver uniform, consistent finishes

Resists Dust and Debris

Open coat construction means the abrasive grains on our 3M™ Stikit™ Gold Disc Roll 216U are placed with space between them to help evacuate sanding dust and other debris and avoid clogging the cutting edge of the grains. The anti-loading coating also allows the disc to continue cutting even when sanding materials that would otherwise clog the disc. All of this adds up to increased productivity and reduced material consumption.

Our 7-hole pattern on select versions of 3M™ Stikit™ Gold Disc Roll 216U helps clear dust from the surface of the disc, making for longer disc life and a more consistent finish.

3M Gold tier abrasives were introduced over 25 years ago

Better Science for Better Sanding from 3M
Our 3M™ Stikit™ Gold Disc Roll 216U is designed for long life — even for tough auto body sanding projects. From its aluminum oxide mineral abrasive to its anti-loading open coat construction to its Stikit™ attachment, this disc roll is another way that 3M applies science to make life easier for professionals in collision repair.
